

moodle-caremp2.com – Professional Self-Study Platform for Medical German

moodle-caremp2.com serves as the official online learning environment for the CareMP2 Program, specifically designed to support international physicians and specialists in their integration into the German-speaking labor market. The platform provides a structured implementation of the recognition procedure for medical licenses in Germany through a blend of flexible self-study and expert-led training.

As one of the most accessible and cost-effective solutions for medical German, CareMP2 offers a comprehensive learning path tailored to the unique requirements of the healthcare sector.

Learning Path and Content

The curriculum aligns with the Common European Framework of Reference (CEFR) and guides learners from foundational German to specialized clinical communication:

- **A1 – B1 (General German):** Independent online learning focusing on grammar, vocabulary, and comprehension.
- Includes **24 progress tests** per level to ensure steady improvement.
- **B2 (Advanced German):** Targeted preparation for official certificates, such as **telc B2** or **Goethe B2**.

Medical Relevance and Practical Application

All materials are designed to reflect real-world clinical environments in Germany. Key focus areas include:

- **Doctor-patient communication** and taking medical histories (anamnesis).
- **Professional documentation**, including discharge letters and medical notes.
- **Specialized terminology** used in everyday hospital and practice routines.

C1 Medicine / FSP Preparation: An intensive preparatory course for the Specialist Language Examination (FSP) required by medical associations.

- Focuses on **10 simulations** of realistic exam scenarios, including doctor-patient communication and medical documentation.

- Consists of **10 individual units** (60 minutes each) for personalized coaching.

Learning Format and Support

- **24/7 Accessibility:** Learners have round-the-clock access to all modules via the Moodle platform.
- **Interactive Speaking Practice:** Each language level (A1-B2) includes **8 online conversation hours** with a language teacher, conducted in small groups of maximum **3 participants**.
- **Cross-Platform Use:** The system is optimized for use on laptops, tablets, and smartphones.
- **Comprehensive Support:** Beyond the platform, CareMP2 provides assistance with the administrative recognition process, relocation (apartment searches, bank accounts), and job placement.

Summary:

moodle-caremp2.com offers a flexible and professionally focused solution for international doctors to achieve the **C1 Medical level** and pass the **FSP** to obtain their license to practice medicine in Germany.
